Exhibits/Sponsorship

Erica Cox

Other Members:

Brian McClain, SURFLANT

Carol Rossler

Dane Hansen

Allyson Jones

Tim Morgan (US Army SOAR)

Andrew Sheetz

Call For Papers

Call for Papers Status: OPEN

Mega Rust is conducted annually to provide a consolidated focus on Navy corrosion issues. Corrosion is a major factor in the readiness and total ownership cost of naval systems and this conference is intended to provide updated information on programs, policies, standards and Fleet experience related to corrosion and to promote discussion and sharing of information on technologies and strategies for controlling corrosion. The conference provides an impartial forum for dialogue between government and commercial organizations, and providers of coatings and corrosion control products, processes, technologies and solutions. Participants include representatives from military, industry, and government organizations involved with research and development, design, engineering, construction, maintenance, modernization and operation of naval systems that are potentially affected by corrosion. The conference covers all segments of the naval services including sea, air, Marine Corps, vehicles, and facilities.
